PROFESSIONAL SUMMARY

Full-stack developer specializing in 4.0 technologies with hands-on experience in building scalable web applications. Proficient in modern development frameworks and tools including Python, Flutter, HTML, CSS, and Bootstrap. Passionate about solving complex coding challenges and delivering innovative solutions through Industry Ready Certification (IRC 4.0) training.

EDUCATION

Basaveshwar Engineering College (A)

Bachelor of Engineering in Information Science and Engineering

Bagalkot, Karnataka

Sept 2023 – Sept 2027

- Pursuing B.E. with focus on software engineering, algorithms, and data structures

NxtWave CCBP 4.0 Academy

Industry Ready Certification (IRC 4.0) in Full-Stack Development

Remote

Aug 2024 – Aug 2027

- Comprehensive training in full-stack development with specialization in 4.0 technologies
- Completed multiple hands-on projects involving frontend and backend development

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3, SQL, Dart

Frontend: React, Flutter, Bootstrap, Responsive Web Design, UI/UX Principles

Backend: Node.js, Express.js, RESTful APIs, Database Design

Databases: MySQL, SQLite, MongoDB

Tools & Technologies: Git, GitHub, VS Code, Postman, Chrome DevTools, Figma

Core Competencies: Full-Stack Development, Problem Solving, Agile Methodologies, Code Optimization

PROJECTS

E-Commerce Web Application

NxtWave CCBP 4.0 Academy

Full-Stack Developer

2024

- Developed a fully functional e-commerce platform with product catalog, shopping cart, and checkout functionality
- Implemented responsive design using HTML, CSS, and Bootstrap ensuring seamless experience across devices
- Integrated backend APIs for user authentication, product management, and order processing
- Optimized page load times by 40% through efficient code structure and asset optimization

Task Management Dashboard

Personal Project

Frontend Developer

2024

- Built an interactive task management application using React with CRUD operations
- Designed intuitive UI/UX with drag-and-drop functionality for task prioritization
- Implemented local storage for data persistence and state management

Static Portfolio Website

Self-Directed Learning

Web Developer

2024

- Created a professional portfolio website showcasing projects and technical skills
- Utilized modern CSS techniques including Flexbox and Grid for responsive layouts
- Achieved 95+ Google Lighthouse performance score through optimization best practices

CERTIFICATIONS & TRAINING

AI Tools Workshop Masterclass – Completed advanced training on leveraging AI tools for development

How to be the Most In-Demand Engineer in 2025 – Professional development course on industry trends

Build Your Own Static Website – Hands-on certification in web development fundamentals

Think Like a CEO: Even Before You Graduate – Leadership and entrepreneurial mindset training

ACHIEVEMENTS & LEADERSHIP

- Successfully completed Industry Ready Certification (IRC 4.0), preparing for modern tech industry demands
- Consistently solved coding challenges and algorithmic problems to strengthen problem-solving skills
- Actively contributed to peer learning sessions and code reviews within the CCBP 4.0 community
- Demonstrated strong self-learning abilities by completing multiple certifications alongside formal education
